

AFD recognizes that many work environments will need to be changed prior to the staff returning due to the COVID-19 pandemic. Businesses are now in the process of evaluating what simple changes need to be made before employees reenter their workspace. Whether it is making changes to the overall space plan, adding the necessary signage to assist with navigating or providing a simple cleaning, AFD is properly positioned to help. We have adjusted our staffing and developed strategic alliances with different vendors to cover all the possible needs a client might have in reopening their space.

Health & Safety

AFD understands that cleanliness has become a top priority to all employers & employees alike. In the Post COVID World, a thorough cleaning can help an employee's day one transition back to the workspace be a more comfortable and less stressful experience. AFD knows what a space should look and what it should feel like the first day of occupancy. We are ready to help make workplaces that were left "as is" back in March look and feel refreshed.

Space Planning & Programming

AFD can assist with inventories, densification studies, layouts and product application. These services allow AFD clients to fully understand what adjustments need to be made and how they can be accomplished without spending a great deal of money. High resolution images, virtual tours and 360-degree views of the space before and after can be provided and used to illustrate the adjustments being made prior to making a major purchase. See Demo Links

Signage & Wayfinding

Helping inform, guide and remind employees how to move and function throughout a work environment is critical in today's new world. Whether it is reminding someone of a direction to take, or to be sure to clean up after oneself, or not to over crowd a room, etc. – clear demarcations are needed. Keep your employees educated and reminded throughout the day with clear identifying markers. AFD can evaluate your space and come up with a few potential plans that not only make a return to work easier but also help everyone continue to properly function as they settle into their workspace.
